RESPONSE TO COMMENTS FOR A CLASS 2 PERMIT MODIFICATION REQUEST AND COMPLETION OF CORRECTIVE ACTION

THE LOS ANGELES COUNTY DEPARTMENT OF AGRICULTURAL COMMISSIONER WEIGHTS AND MEASURES PICO RIVERA FACILITY

1. INTRODUCTION

On August 15, 2007, the Los Angeles County Department of Agricultural Commissioner / Weights and Measures (ACWM) publicly noticed a Class 2 Modification Request for its Pico Rivera facility's (Facility) Hazardous Waste Facility Permit (Permit). The public notice also included the Department of Toxic Substances Control's (DTSC) proposed approval of the Completion of Corrective Action to close the remainder of the Facility

The purpose of the Class 2 Permit Modification is to revise the closure activities in the original DTSC-approved Closure Plan dated June 20, 1985. DTSC received a comment letter which is responded below. DTSC has not made any revision to the Revised Closure Plan as a result of the received comments.

The purpose of the Corrective Action Completion is to formally close the entire Facility based on the DTSC-determination that the investigation and remediation of a Solid Waste Management Unit at the Facility will not have a significant impact on human health and the environment.

2. PUBLIC COMMENTS FROM KIMBERLY SOLLENDER

"Is the property going to be a nightmare of Apts., condos or 2 story homes? which will ultimately look right into our backyards! Has anyone thought of selling the property to existing owners? Who cares about the people who already live here! Please keep me informed and on the mailing list".

Response to Comments

Please note that the scopes of the projects under DTSC oversight are limited to the Revised Closure Plan and the proposed Completion of Corrective Action. The ACWM proposes to clean the site to an unrestrictive use cleanup level. DTSC does not have jurisdiction on the future use of the Facility after it closes to an unrestrictive use cleanup level.

For any question regarding the future use of the property, DTSC recommends that Ms. Sollender contact the ACWM.
